

WordPress dla nie**PHP**ujących

- **Types** - własne typy postów, własne pola
- **Views** - pobieranie i wyświetlanie treści
- **CRED** - tworzenie, modyfikacja postów z poziomu front-endu

# Kto używa WordPressa?

Dla kogo jest Views?

- Użytkownicy
- programiści
- Pr0gramiści

„Wordpress to nie tylko platforma blogowa, to CMS”

~Paulo Coelho

the\_title()

# WP\_Query

wp\_link\_pages()

```
<?php  
// the query      setup_postdata()  
$the_query = new WP_Query( $args ); ?>
```

```
<?php if ( $the_query->have_posts() ) : ?>
```

```
    <!-- pagination here -->
```

is\_main\_query()

```
    <!-- the loop -->
```

```
    <?php while ( $the_query->have_posts() ) : $the_query->the_post(); ?>
```

```
        <h2><?php the_title(); ?></h2>
```

```
    <?php endwhile; ?>
```

```
    <!-- end of the loop -->
```

the\_permalink()

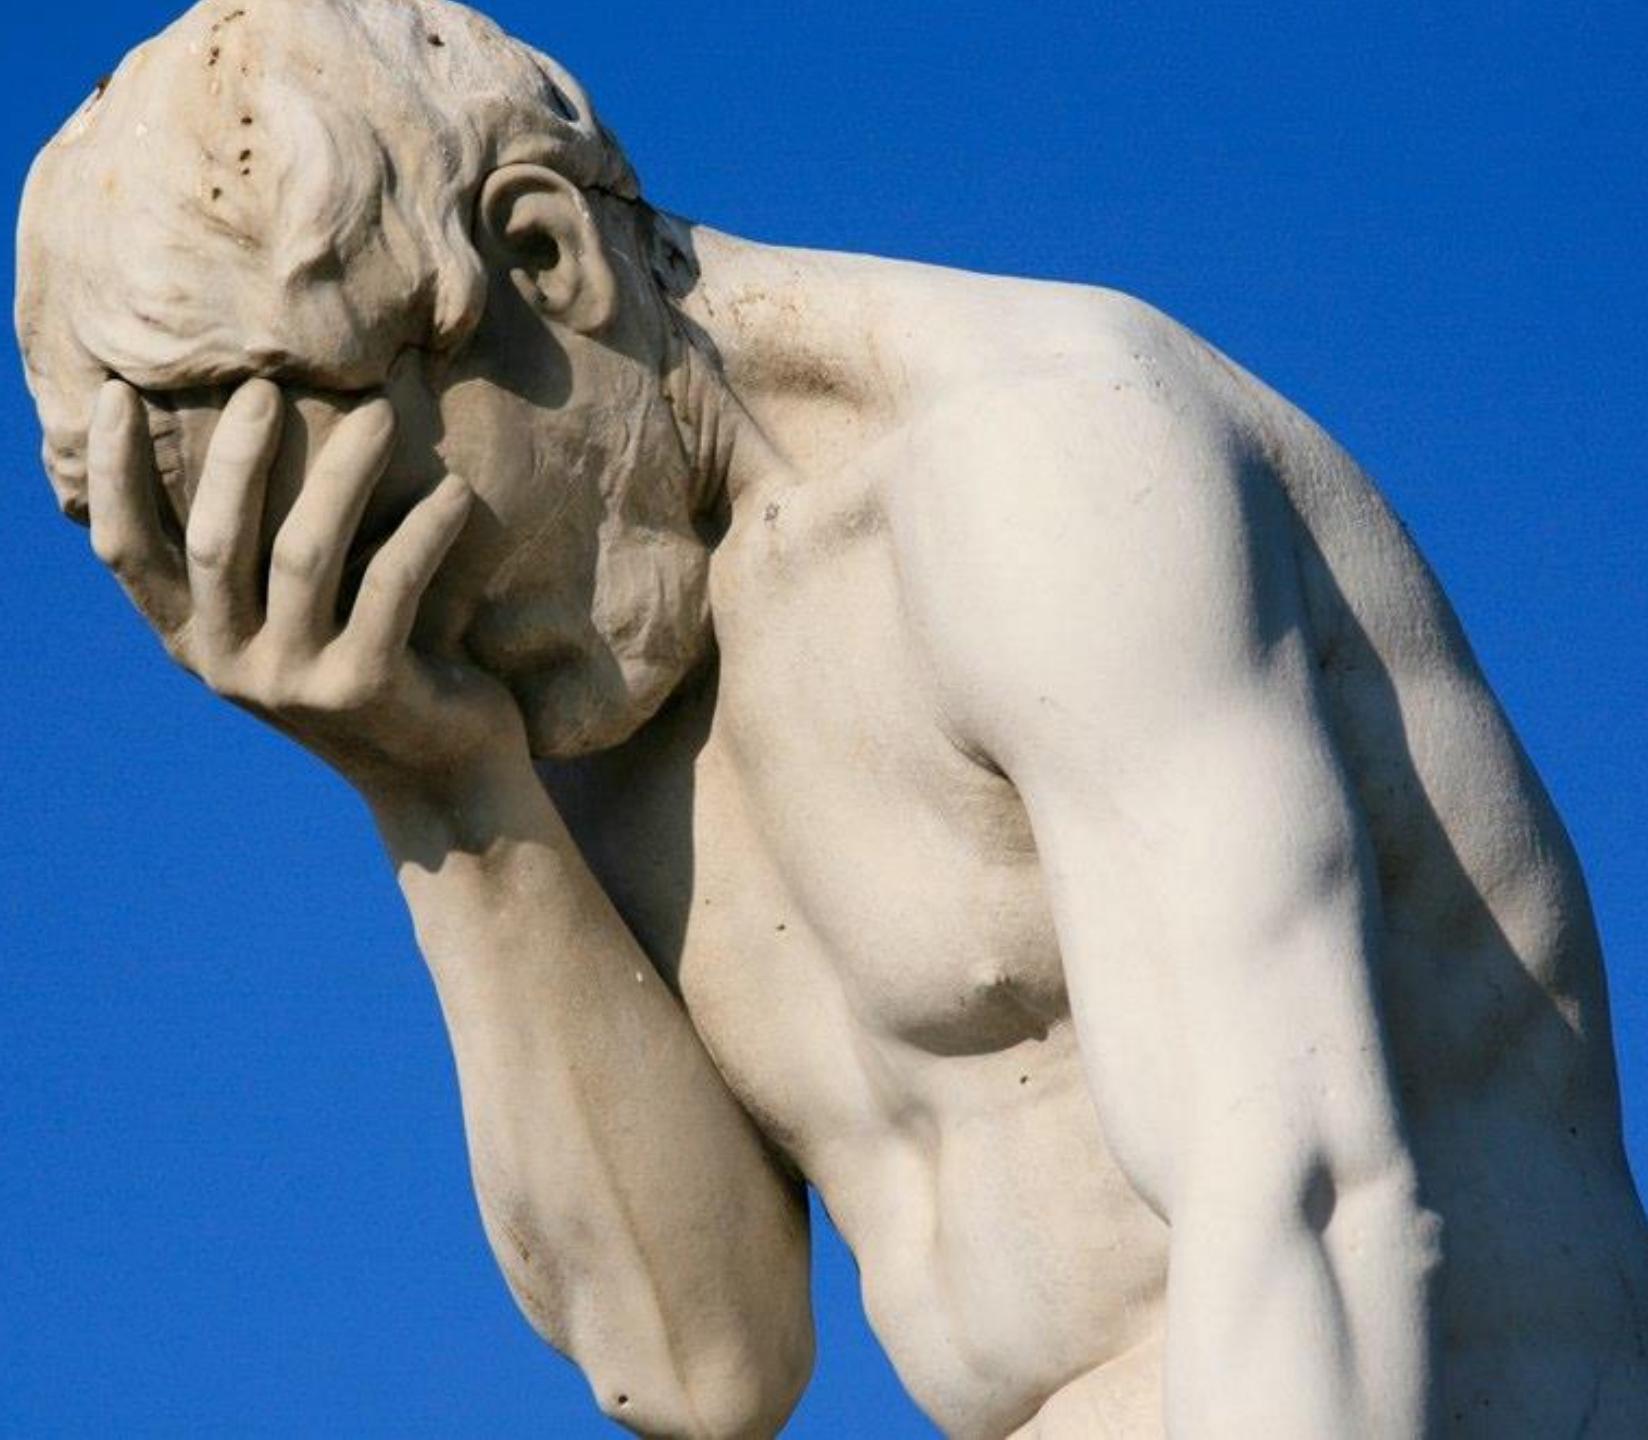

```
    <!-- pagination here -->  
    <?php wp_reset_postdata(); ?>
```

bloginfo('description')

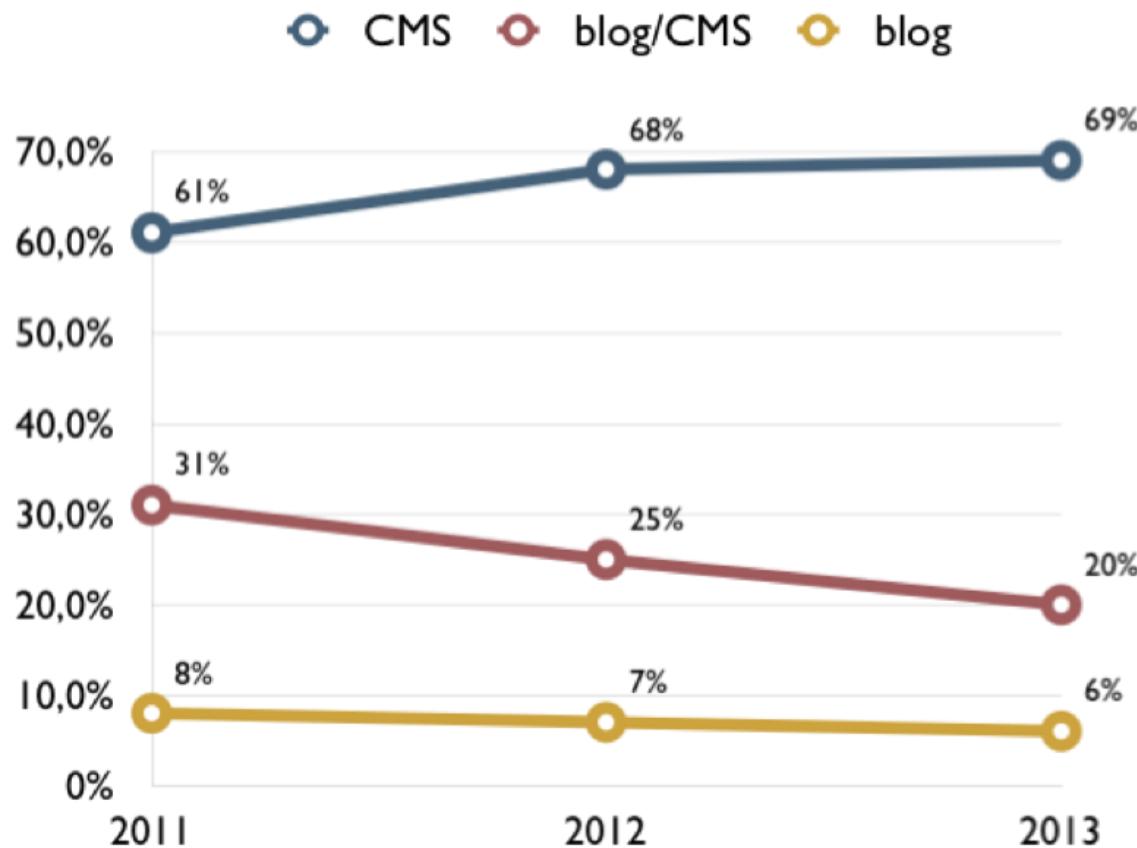

```
    <?php else: ?>
```

```
        <p><?php _e( 'Sorry, no posts matched your criteria.' ); ?></p>
```

```
    <?php endif; ?>
```

# „Wordpress to nie tylko platforma blogowa, to CMS”

# Views potrafi:

- Tworzyć dowolne WP\_Query (Normal Views)
- Modyfikować domyślne zapytania (Archive Views)
- Tworzyć szablony (Content Templates)

# Wyklikaj WP\_Query

The query section determines what content the View loads from the database

**Content selection** This View will display Posts

Posts  
 Pages  
 Media  
 Products  
 Reviews  
 Reviewers  
 Ratings  
 Tasks

**Query options**  Don't include current page in query result

**Ordering** Order by: post date Descending

**Limit and offset** Display 3 items  
Skip first None items

**Query filter** No filters set

**Add a filter**

**Add a new View**

A View loads content from the database and displays it in various ways.

**What kind of display do you want to create?**

Display all results  
The View will output all the results returned from the database.

Display the results with pagination  
The View will display the query results in pages.

Display the results as a slider  
The View will display the query results as slides.

Display the results as a parametric search  
Visitors will be able to search through your content.

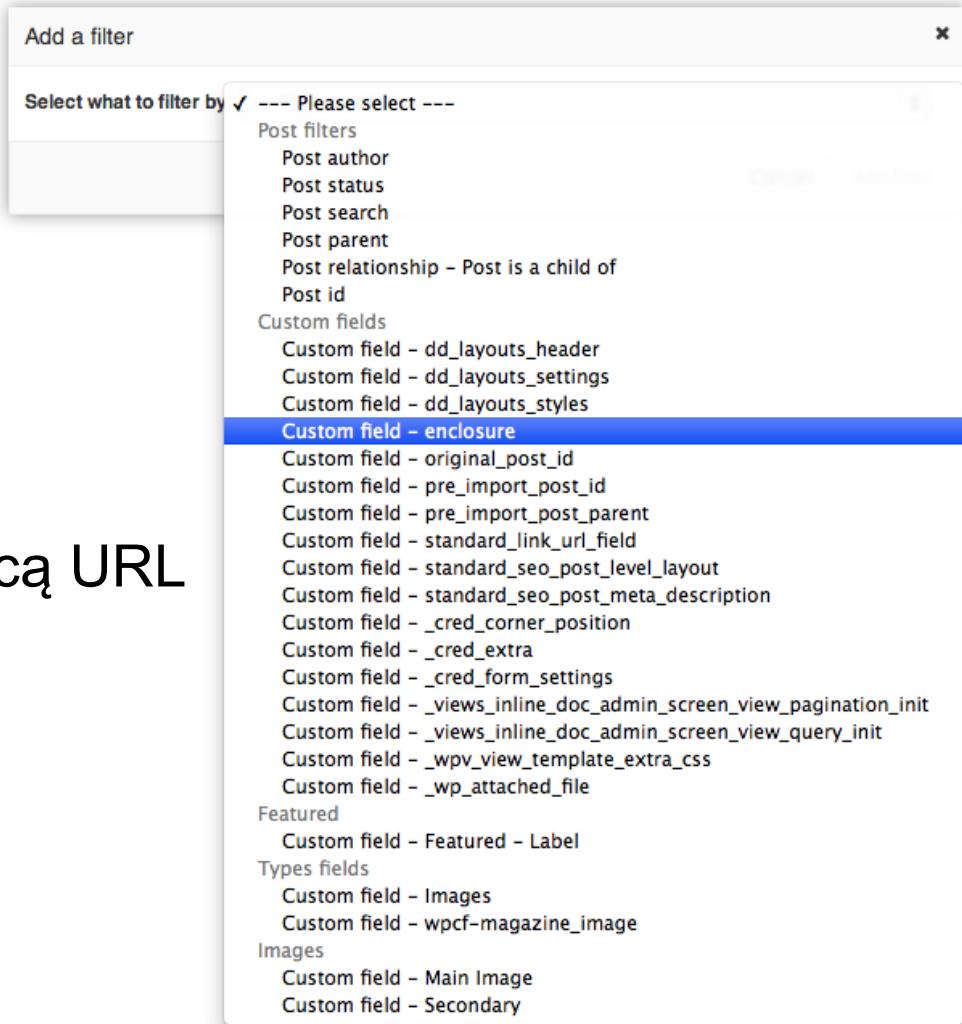

Full custom display mode  
See all the View controls open and set up things the way you like.

**Name this View**
